

MICHELE MINARDI

TECHNICAL BUSINESS ANALYST · Digital Processes · Product · Data · AI

PROFILE

Technical Business Analyst with 8+ years across business, data and finance, working at the intersection of processes, technology and people. I translate business needs into functional requirements and digital workflows, working from early analysis through testing, release and production support. Hands-on and AI-enabled: strong SQL and data-analysis background, experience with digital platforms and system integrations, and a growing focus on AI-assisted automation and rapid prototyping. Outside my core role, I build digital products and experiments to learn new technologies by using them.

EXPERIENCE

Digital Process Engineer / Technical Business Analyst

Multiply Group · *Nov 2022 – Present*

- **Digital platforms & process design** Design and digitalize end-to-end workflows for corporate lending and other data-intensive processes, working across business, operations and technology teams.
- **Requirements & product delivery** Analyze business needs and existing processes, translating them into functional requirements, process rules and Azure DevOps User Stories.
- **End-to-end delivery** Work across the lifecycle from requirements and grooming through Figma validation, functional/UAT testing, release coordination and post-deployment verification.
- **Systems & integrations** Define requirements and coordinate API/SFTP-based integrations between proprietary platforms, internal systems, major European banking/financial-services clients and external providers.
- **Data, automation & operations** Use advanced SQL and data-analysis tools to investigate issues, validate data flows and support automated/semi-automated imports, recurring reporting, recovery/reprocessing and production controls.
- **AI-enabled workflows** Use GenAI for requirements, documentation, data handling, process analysis and rapid prototyping; Python is used mainly for data handling and AI-assisted automation.

Credit Risk & Fraud Analyst

Gruppo Montenegro · *Dec 2018 – Jan 2021*

- Investigated fraud cases and assessed customer creditworthiness using financial statements, payment behavior and risk indicators; supported credit decisions and management reporting.
- Monitored exposure and customer payments, supporting operational risk controls and reconciliation in SAP.

Credit & Treasury Analyst

Unigrà · *Mar 2017 – Dec 2018*

- Reviewed credit applications, financial data and payment history; recommended credit limits and monitored exposure for Italian and international customers.
- Supported cash-flow, credit and treasury activities across group entities using Excel, SAP and PITECO.

Marketing & Statistical Analysis

Acantho / Hera · *2014 – 2015*

- Applied statistical analysis, benchmarking and customer-satisfaction research to support pricing, marketing decisions and management reporting.

SELECTED PROJECTS

Eulance / PRODUCT / BUSINESS ANALYSIS / AI

Designed an interactive concept for an EU cross-border freelance marketplace, mapping workflows from job posting and matching to escrow, delivery and invoicing, including EU-specific product/compliance requirements.

OpenPrometeo / AI AUTOMATION / DIGITAL BRAND

Built an independent philosophy and visual-storytelling project to 12K+ followers and 1,400+ posts, plus an AI-assisted local content workflow with persistent memory and visual rules.

Ailingo / AI / PRODUCT PROTOTYPE

AI-powered language-learning prototype using personalized exercises and dynamic content generation, built through AI-assisted development.

Portfolio & Projects
Imola, Italy · Open to remote / relocation

EDUCATION

MSc · Statistical, Financial & Actuarial Sciences

University of Bologna · 2014–2016

110/110 summa cum laude

BSc · Statistics, Business & Marketing

University of Bologna · 2011–2014

108/110

Erasmus Exchange · Business

Anglo-American University · Prague

Thesis research period · San Diego, California

CORE SKILLS

Business & Requirements Analysis
Product & Process Design
SQL & Data Analysis
Process Automation
UAT & Functional Testing
System Integration Requirements
Agile Delivery & Backlog Management
Stakeholder Management

TOOLS

SQL · MS SQL Server · Power BI
Excel · Azure DevOps · Figma
Python (data handling)
API · SFTP · XML
Prefect (workflow operations)
SAP · Apache Superset
ChatGPT · Claude · M365 Copilot
